Hi I'm Damien a Frontend Web Developer. I focus on making web applications using React.js and TailwindCSS. I like to spend most of my free time coding and would love to find an opportunity to do it full-time. I'm excited to dive deeper into the intricacies web development has to offer! Feel free to see some of my work listed below.

Projects

Innovative Tech

<https://innovativetechcompany.netlify.app/>

- This project was built based off of a wireframe I had generated from a website. I built this project with the purpose to see how well I could make a design come to life based on a given design, while also making some changes along the way as I saw fit. This project was built with React.js and TailwindCSS.

Personal Portfolio

<https://damienlanghorn.netlify.app/>

- A showcase of some of my personal projects. This project allowed me to focus on my own design ideas by building something for scratch without a wireframe. Along with React.js and Tailwind this project also includes GSAP for animations.

Education

University at Albany

2019-2022

Electrical and Computer Engineering

Albany, NY

- Fraternity & Sorority Life Event Coordinator and Poster Designer
- Created different flyers for various events hosted by the club

Skills

Web Development HTML, CSS, JavaScript, React, Tailwind CSS, GSAP
